

Australia has the highest rate of skin cancer in the world, mainly caused by exposure to ultraviolet (UV) radiation from the sun. To help raise awareness about the importance of sun protection, the Cancer Council Western Australia has a SunSmart Van which can attend large outdoor events.

Why have the SunSmart Van at your outdoor event?

One in five Australians get burnt on a typical weekend. The SunSmart Van can help remind people to be SunSmart at your event. The SunSmart Van dispenses free sunscreen, provides information and offers a wide range of sun protection products for sale.

It is a community-funded service, attending events in the Perth metropolitan area. As there is only one van in operation our aim is to promote the SunSmart message to the event with the largest audience (minimum of 3,000 adults in attendance).

How to request the SunSmart Van for an event

Bookings are essential and requests should be submitted with at least three weeks' notice. To make a request, complete the details below and email resourceofficer@cancerwa.asn.au or fax to 9212 4334.

For further information please phone the Resource Officer on 9388 4363
